

ACTS- Anti-Corruption toolkit for SMEs

08 luglio 2016

The overall objective of the ACTs project is to provide expertise and tools for combating the onset and spread of corruption in the private sector, with special focus on Small to Medium Enterprises (SMEs). With its small size and lack of resources (e.g. well-staffed legal departments), the SME is particularly vulnerable to corruption risk, and unable to deploy effective strategies to defend itself.

This overall objective will be achieved through three specific, highly interconnected objectives.
